Luna Guitars

Take down a musical instrument. Let the beauty you love be what you do. ~ Rumi...

Luna Guitars

As Luna Guitars' Executive Director and Artistic Designer, I'm often asked what inspired me to create Luna.

Quite simply, the inspiration for Luna Guitars was my mother, a pioneering female bass player in the traditionally male music world.

I watched her literally struggle with heavy instruments that took their toll on her petite frame over the course of her career. So it was with her physical challenges in mind that I conceived Luna's unique designs: architecturally slimmer and lighter guitars that deliver an improved playing experience combined with the uncompromising sound quality of high-end instruments.

Beyond physical playing comfort and quality, Luna is about something more intangible. It is about celebration of the incandescent spirit that burns in the core of each of us. It is about passion. It is about heart. Creativity. Beauty. But ultimately, it is about love.

Luna Guitars is a tribute to that luminous spirit that lives in and unites us all, and to my mother, Hilda Williers.

Shine On!

Yvonne de Villiers

Luna Guitars...A Unique Playing Experience ~ An Extraordinary Spirit in Music

Luna is all about choice. Because Luna Guitars is a woman-founded company committed to creating instruments that are more reflective of females' forms and sensibilities, our instruments bring definite feminine energy to the guitar-playing world. Female musicians now have more choices and have embraced Luna enthusiastically.

But make no mistake – there have been no trade-offs. Luna Guitars are sleek, elegant, well-built instruments that deliver an uncompromising sound quality that's sure to captivate even the most discriminating musician.

That's why Luna models are popular choices with male players as well. They buy them for themselves as often as they choose Luna Guitars for the significant females in their lives. And for youngsters who are just beginning to experience the richness that music can offer, Luna's student guitars pack our signature design elements into instruments that are perfectly sized for smaller hands. For musicians who are as varied and unique as the songs they play, Luna Guitars offers the ideal selection of instruments.

We at Luna embrace the opportunity to contribute to each player's emotional and spiritual journeys: personal exploration, growth and joyous expression through music for all beings that inhabit the planet. May we all shine on!

Look for These Signature Features On Luna Guitars

Signature features vary by model, but all Luna Guitars offer their own combination of our distinctive design elements:

- Petite Neck Profile for Superb Playing Comfort
- Exclusive Luna Featherweight Construction
- Decorative Luna Crescent Moon Sound Hole Inlay
- Distinctive Luna Crescent Moon Logo on Headstock
- Exclusive Luna Moon Phase Fretboard Markers
- Luna State-of-the-art Ornamentation Technology
- Intricately Beautiful Luna Custom Inlay Designs
- Exclusive Artwork by Renowned Artists
- Expressive Luna Color Palette

Whatever you can do or dream you can, begin it.....

Do something because it feels right, not because it makes sense.....

The Ancient Art of Henna

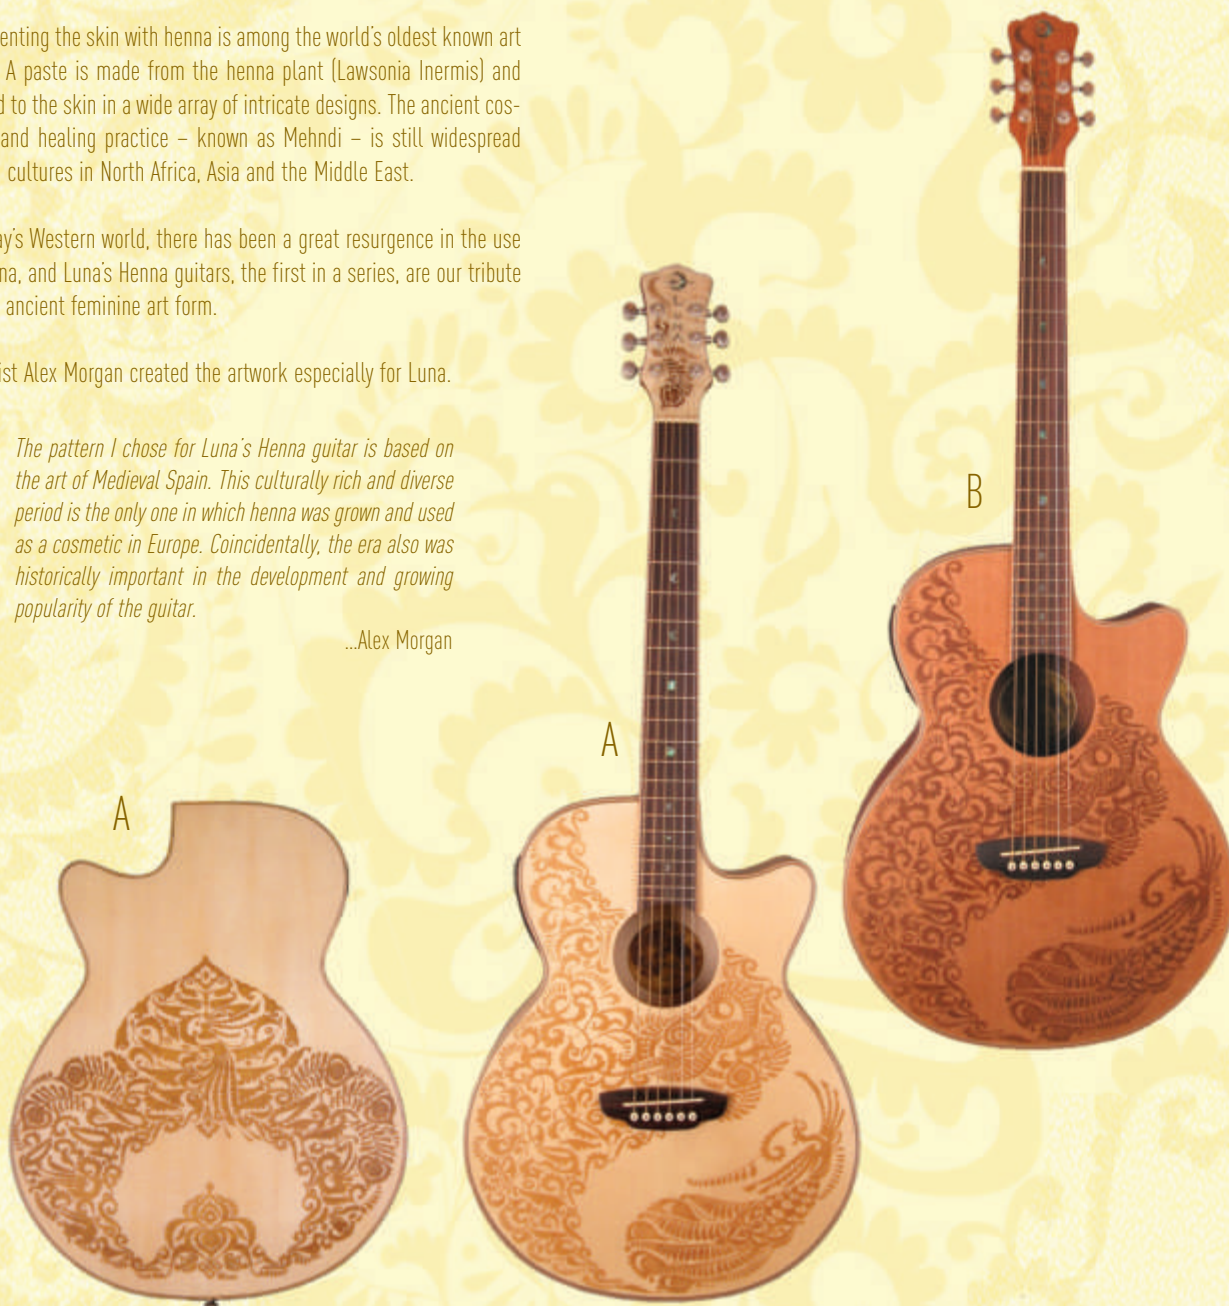

Ornamenting the skin with henna is among the world's oldest known art forms. A paste is made from the henna plant (*Lawsonia Inermis*) and applied to the skin in a wide array of intricate designs. The ancient cosmetic and healing practice – known as Mehndi – is still widespread among cultures in North Africa, Asia and the Middle East.

In today's Western world, there has been a great resurgence in the use of henna, and Luna's Henna guitars, the first in a series, are our tribute to this ancient feminine art form.

UK artist Alex Morgan created the artwork especially for Luna.

The pattern I chose for Luna's Henna guitar is based on the art of Medieval Spain. This culturally rich and diverse period is the only one in which henna was grown and used as a cosmetic in Europe. Coincidentally, the era also was historically important in the development and growing popularity of the guitar.
